

Current Energy is an innovative corporation with a true sense of social and environmental responsibility; joining our team is a great opportunity to make a green impact.

Position: Business Analyst

Overview: Current Energy, an energy efficiency solutions provider, is seeking an individual with business and financial analysis experience. The ideal candidate is self-motivated, can produce results for senior executives, and thrives in a high activity based environment.

Brief Position Description: This individual will be a key player responsible for conceptualization and building of various types of models and conducting business and financial analysis across all business units. This individual will also support the development of the annual revenue/expense budget and monthly analysis of key performance indicators on a micro and macro level.

Primary Duties and Responsibilities: (Not all inclusive)

- Provide leadership and lead consultation in assessing the strategies and performance of key performance indicators; lead the development of strategic models including the assessment of the response of market conditions, competitive pressures, business challenges, return on assets; lead review of business cases and investment strategies and help the company focus on prioritizing activities that respond to the dynamic environment and create value to the organization.
- Plan and conduct in-depth and often multi-variant analyses on a variety of complex business projects/issues from concept to and including presentation.
- Develop appropriate assumptions, analyze results and make recommendations, as well as articulate the rationale for the methodology chosen.
- Based on the strategic and business implications that emerge from analysis, lead the development, preparation and delivery of presentations of analysis of results to senior management.
- Establish responses to urgent ad hoc and routine requests to meet the information requirements of senior management, Board of Directors, and external agencies and organizations for critical financial or operational decisions.
- Possess a solid understanding of business problems/issues as it relates to assigned project.
- Design and Optimize the Executive Dashboard.
- Identify sources of data and influence procurement of data, at all levels, to support performance measurement, comparative metrics and dashboards and strategic and capital planning and analysis.
Consult with clients with keeping measures aligned with strategic initiatives and when possible with industry standards and/or benchmarks.
- Responsible for working on complex projects (including ad-hoc analysis for all business units) with general direction and minimal supervision.

Requirements:

- Bachelors degree in Economics, Finance, Business Administration (with a quantitative emphasis), or equivalent experience required. MBA preferred
- 3+ years of work experience analyzing, manipulating, modeling and forecasting capital and/or financial data, including a thorough understanding of financial statement construction.
- Experience in budgeting and long range planning is a plus.

- Excellent communication and presentation skills required. Must have demonstrable experience in both preparing and delivering presentations to business.
- Candidate must have the ability to relate financial information to the broader business. Strong financial and statistical analysis highly preferred. Solid knowledge and understanding of accounting principals.
- Strong proficiency in MS Office Suite required, especially Excel and Power Point.
Ability to cultivate and maintain effective partnerships/working relationships, as well as influence.
- Eager and Career Growth Oriented
- Able to work in a fast-paced high-growth environment

We offer a competitive base salary and excellent benefits package! All inquires will be kept confidential. Current Energy is an Equal Opportunity Employer M/F/D/V. Please send resume, with salary history to marci.sogan@currentenergy.com. or fax to 469-533-7652
