**CURRENT ENERGY EXHIBITS AT FIRST
WORLD FUTURE ENERGY SUMMIT IN ABU DHABI**

***Dallas Company to Showcase Energy Efficiency Building Solutions
Through Automation and Controls***

Dallas, Jan. 21, 2008 – Current Energy, a Dallas-based company providing energy efficiency products and services for commercial and residential customers, is participating as an exhibitor in the first World Future Energy Summit (WFES), Jan. 21 – 23, in Abu Dhabi in the United Arab Emirates. Current Energy will be exhibiting at stand #429 at the Abu Dhabi National Exhibition Centre.

“The World Future Energy Summit is an impressive gathering of experts and ideas from the most innovative energy companies throughout the world,” said Joseph L. Harberg, Current Energy principal partner. “This event is perfectly aligned with Current Energy’s mission to empower individuals to make smart energy decisions that lead to financial and environmental benefits.”

A recent recipient of the U.S. Department of Energy’s “Energy Innovators Award,” Current Energy is showcasing its automation and controls technology and sharing new ideas for energy efficiency with other companies at the WFES. Through significant investment in the latest technology for commercial automation and controls, Current Energy can save businesses up to 35 percent on energy costs.

“Current Energy sees automation and controls as the future for reducing energy consumption for companies around the world,” Harberg said. “We are proud to be a part of this first-time event and to discuss the future of energy efficiency solutions with other energy leaders.”

Harberg, who is also the host of the Current Energy Report, a U.S. syndicated radio show, will be taping interviews with other energy executives during the WFES on a variety of energy saving and green building topics. The interviews will be incorporated into future segments of the Current Energy Report radio show to introduce today’s pioneers of the global energy industry to a broad audience.

The Current Energy Report airs live every Saturday from 3 – 4 p.m. CST in the United States’ fifth and sixth largest radio markets – Dallas/Fort Worth (570 KLIF-AM) and Houston/Galveston (KPRC 950-AM) – and on radio stations in more than 28 cities in three states in the southeastern U.S. region. The radio show is also syndicated via ABC’s satellite service to a potential audience of over 10 million listeners each week. The Current Energy Report is also available via podcast reaching national and international audiences. To listen online or learn more, please visit www.currentenergy.com/aboutus/radio.php.

About Current Energy

Current Energy, headquartered in Dallas, is a one-stop, comprehensive resource for energy efficiency solutions. Current Energy helps residential and commercial customers manage energy consumption, save on energy bills and contribute to the sustainability of the planet. The company was founded in 2001, anticipating the impact that energy deregulation would have on companies. Since then, the company has grown to include three divisions – Power Brokers, Current Energy Commercial and Current Energy Retail, which operates the world's first energy efficiency store™. Current Energy was recognized by the U.S. Department of Energy in the fall of 2007 with an Energy Innovators Award. For more information, visit www.currentenergy.com.
